With EZ Cab we create beautiful, versatile elevator interiors that easily interlock together using a streamlined installation process.

EZ DESIGN

Travertine has been a leader in custom elevator interiors for over 20 years. Our success is founded on quality workmanship, expertise in the elevator industry, and having an efficient process for completing projects.

Our fully customized Travertine line of interiors has set the standard in elevator interior project management and luxurious appearance. Now, we have brought these skills to a semi-custom market with the development of EZ Cab. We provide many impressive, versatile choices for panel layout and materials for the panels, ceiling, reveals, handrails, and more.

Our library of completed projects and renderings provides inspiration and shows the great versatility of EZ Cab. Our innovative portal allows users to simply click to make selections for each part of the interior. Thousands of combinations are possible, guaranteeing that you will find just the right look. Renderings will be available instantly in our 3D viewer that can be saved and downloaded to share.

Simply provide your measurements and make your selections:
The design process can be completed in minutes!

EZ INSTALL

Using the client's measurements and design selections, we will precisely manufacture, systematically crate, and ship the beautiful new interior to the project locations. Then all that is necessary is someone with an electric screwdriver and a level to simply click the panels into place and attach them to the elevator cab.

If installation is not your thing or there just are not enough hours in the day, no problem. We can install your new interiors for you with highly trained IUEC installation crews for a quick, no hassle job complete.

EZ SUPPORT

Travertine designed EZ Cab to practically install itself. The simplicity of the EZ Cab design and installation process eliminates the need for a project manager.

But don't worry, unlike others in the industry, we won't leave you completely on your own. At the time that a quote is created, each EZ Cab project is assigned an installation supervisor who will be available to answer any questions you may have.

Our experts are available to insure that the project runs smoothly at every stage.
